### PROFILE

An independent developer of Language, Framework and render side. I use packages/frameworks for the needs, develop them, and if they are open source, I fix their issues and report their deficiencies. Apart from these, I do related things research and think

### EDUCATION

Management Information Systems, Istanbul University

2022 – 2026  
Istanbul, Turkey

### PROFESSIONAL EXPERIENCE

#### Lead Developer, Alfatek

12-2022 – 03-2023  
Sakarya, Turkey

In my role, I serve as a mentor to team members, providing guidance and support as they work on various projects. As part of my responsibilities, I establish project standards and ensure that all development work aligns with the specific project requirements. In addition, I take charge of overseeing the project configuration, distribution, and stabilization, ensuring that all aspects of the project are effectively managed and maintained. My proactive approach to project management helps ensure that all team members are working efficiently and effectively, and that the project is delivered on time and to the highest possible standard.

#### Full Stack Developer, Alfatek

10-2021 – 12-2022  
Sakarya, Turkey

I am experienced in developing a wide range of projects using cutting-edge technologies such as Vue, NodeJS, TypeScript, MongoDB, Socketio, JetStream by Nats, Redis, MySQL, Php, Kubernetes, and Docker. My experience spans across multiple roles, including Frontend, Backend, DevOps, and Mobile App Development. With a strong foundation in these technologies, I am well-equipped to tackle complex development challenges and deliver innovative solutions that meet the needs of clients and end-users.

#### Jr. Full Stack Developer, Alfatek

07-2021 – 10-2021  
Sakarya, Turkey

I made various optimizations and improvements using Vue, MongoDB, MySQL, Redis, Socketio and NodeJS

### PROJECTS

#### Mix Architecture

02-2023 – present

The Mix Architecture I have developed incorporates a variety of established design patterns and architectures, carefully selected for their effectiveness and suitability to the project requirements. This approach ensures that the resulting architecture is both robust and flexible, providing a solid foundation for the development of complex software systems. The Mix Architecture draws on the strengths of multiple approaches, resulting in a solution that is optimized for performance, maintainability, and scalability.

#### GalataJS

08-2022 – 12-2022

I created a scalable NodeJS framework with modular packages that is flexible, easy to work with, and optimized for performance. It can handle large-scale applications and is adaptable to a wide range of projects.

### SKILLS

#### Technical

React, Golang, Vue, NodeJs, Angular, Typescript, Java, .Net

#### Tools

MongoDB, MySQL, Microservices, GCloud, Redis, Kubernetes, Docker, RabbitMQ, Apache Kafka

### LANGUAGES

Fluent English
