About me

An independent developer of Language, Framework and render side. I use packages/frameworks for the needs, develop them, and if they are open source, I fix their issues and report their deficiencies. Apart from these, I do related things research and think.

Experience

Lead Developer @ Alfatek

Dec 2022 – Present

I mentor the people in the team, set the project standards according to the project requirements and ensure that the development is made accordingly, I ensuring and maintaining the project configuration, distribution and stabilization.

Full Stack Developer @ Alfatek

Oct 2021 – Dec 2022

I have developed various projects using technologies such as Vue, NodeJS, TypeScript, MongoDB, Socketio, JetStream by Nats, Redis, MySQL, Php, Kubernetes and Docker. In all these, I worked as Frontend, Backend, Devops and Mobile App Developer.

Creator @ GalataJS

Aug 2022 – Present

I have developed a scalable and seperated to packages NodeJS Framework that is easy to write and understand.

Jr. Full Stack Developer @ Alfatek

Jul 2021 – Oct 2021

I made various optimizations and improvements using Vue, MongoDB, MySQL, Redis, Socketio and NodeJS
